

Three Point Chucky Set Instructions

This set of two Chuckies is also offered with our optional Chucky MT2 Arbor.

If you already have one, you can use that.

I know you know that but I have to put it in the instructions for those who are new to using Rubber Chuckies. :-)

Anyhow, this set is pretty simple to use.

**Make sure the Three Point Chucky is threaded all the way onto the Arbor and/or Live Center.
It may or may not be necessary to use the Nut on the Arbor or Live Center.**

**Mount one Chucky on the Headstock side (in your Scroll Chuck or with a Chucky MT2 Arbor)
and one on the Live Center.**

Turn your Cube on end and insert it into the Equilateral Triangle hole in one of the Chuckies.

**I usually do the headstock side first – then rotate the Live Center until it matches up with the
opposing point.**

Tighten up your tailstock and and Chucky to the workpiece and you are good to go.

You will be able to turn many different sizes of cubes.

**However, if you find that the Chucky opening is too large for the cube you are using; you can
remove some material off the end – thus making the opening smaller. But be careful and use
LIGHT CUTS!**

**If you wish to remove and remount the Cube; simply draw reference lines on the face of both
Chuckies and Cube with a pencil to aid in remounting the workpiece.
When finished erase the pencil marks.**

**The safe use of any Rubber Chucky product is entirely the responsibility of the purchaser/user. If you do
not agree with this, please return the Rubber Chucky product immediately for a full refund. Your use of
any Rubber Chucky Products, LLC product will constitute your agreement to your responsibility.**
